

TECHNICAL INFORMATION

Sink Systems

Safety is of primary importance in the preparation room. At the clean-up station, it is essential to minimize cross-contamination. Our sink systems are equipped for hands-free operation, making clean-up easier and reducing the spread of toxic materials. DST, Ltd. offers separate instrument and hand sinks that meet OSHA requirements. Our sinks require the use of tempered water supplied by a thermostatic mixing valve.

HAND SINK SYSTEM DST 301
