

TECHNICAL INFORMATION

Volume Pressure Control System

DST 302

This booster pump system, consisting of pump, pressure gauge and pressurized tank, provides constant water pressure required for proper operation of hydro-aspirator systems and high gallon flush china systems.

SPECIAL FEATURES

- recommended for the proper operation of water control units and china morgue table receptors
- unit is pre-set to cycle on and off as needed to maintain correct water pressure
- long lasting, high quality tank and pump

PUMP SPECIFICATIONS

- length: +/- 17½"
- height: 9"
- width: 10"

TANK SPECIFICATIONS

- diameter: 16"
- height: 32"

INSTALLATION

- one 1" cold water line to the preparation room
- location as close to the preparation room as possible
- install reduced pressure backflow preventers in front of volume pressure system
- install in accordance with all applicable codes
- clean out all plumbing lines prior to start-up
- floor drain recommended
