DUNCAN STUART TODD

THE PREPARATION ROOM SPECIALISTS | SINCE 1991

PREPAIR G2 HVAC SYSTEMS

Air Systems for Safety and Comfort in the Preparation Room

PrepAir systems are engineered to address the unique requirements for air quality in the preparation room.

Efficiency

You will see the benefit of the PrepAir G2 heat recovery core reflected in your monthly energy bills. When compared to a traditional HVAC system, the PrepAir can be as much as three times more efficient. The heat recovery based system also helps maintain a comfortable room environment.

Compliance

Our customers have depended upon Duncan Stuart Todd to solve their air quality issues for over 25 years. Our PrepAir systems are specifically designed to meet OSHA air mandates for the preparation room.

Design and Support

Breathe easy in an odor-free environment. The PrepAir G2 heats, cools and ventilates with 100% fresh air. DST works with you and your contractor throughout the design and installation phases to ensure an optimal installation. A full set of CAD drawings and maintenance instructions are also provided.
