THE PREPARATION ROOM SPECIALISTS | SINCE 1991

CUSTOM CABINETS DST 700

FEATURES

Countertops and backsplashes are constructed of solid surface material for superior moisture and stain resistance

Cabinets are constructed of moisture resistant core material with a water absorption rate 78% lower than plywood or standard particle board

Doors and door fronts are medium density fiberboard (mdf) with plastic laminate for surface uniformity

Door faces are laminated in your choice of standard finishes

Pre-cut mounting holes for Duncan Stuart Todd, Ltd. supplied equipment make installation easy and prevent costly errors

All cut-outs and exposed edges are sealed
