PREMIER SOURCE

YOUR SINGLE SOURCE FOR A COMPLETE NEW PREPARATION ROOM

DESIGN › PRODUCT › VENTILATION › OSHA COMPLIANCE › INTERIORS

When you build your new preparation room, let Duncan Stuart Todd, Ltd. simplify your life. With our Premier Source Design plan, there is no guess work. Our service is complete. Our products are modern. Our experience is well-documented.

DESIGN

Premier Source Design assures you of a well thought out master plan for a 21st century preparation room that meets the highest industry standards. Premier Source incorporates professional design coupled with a range of equipment for a safe, comfortable and efficient workplace. This pairing of design and products results in cost savings over normal design fees and helps prevent construction delays.

PRODUCT

DST designs and manufactures many of the industry's leading products for preparation rooms, such as water control units and morgue table receptors. In addition, we supply products that contribute to the safety and well being of the embalmer.

VENTILATION

DST's exclusive PrepAir HVAC system was designed specifically to meet OSHA mandates for air quality in the preparation room. PrepArm, a device for localized exhaust ventilation (LEV), provides additional protection from toxic vapors. A system for air filtration completes a total ventilation program.

OSHA COMPLIANCE

DST preparation rooms meet all the requirements for OSHA compliant product and ventilation in the embalming room. State Inspectors consistently give our rooms high marks for meeting regulatory and compliance standards.

INTERIORS

With Interior Elements, there is no need for a drab and dreary environment in the preparation room. You can select interior design elements for countertops, cabinet faces, wall coverings, rubrails, paint and medical flooring. Seven coordinated palettes for finishes and materials simplify the decision making process.
