

TECHNICAL INFORMATION

VOLUME PRESSURE CONTROL SYSTEM

DST 302

This booster pump system, consisting of pump, 20-gallon pressurized tank and pressure gauge, provides constant water pressure required for proper operation of water control units, hydro-aspirator systems and high-gallon flush china systems.

SPECIFICATIONS

Pump length: +/- 17.5"

Pump height: 9"

Pump width: 10"

Tank diameter: 16"

Tank height: 32"

INSTALLATION

One 1" cold line to the preparation room

Locate as close to the preparation room as possible

Install reduced pressure backflow preventer in front of volume pressure control system

Install in accordance with all applicable codes

Flush all plumbing lines prior to start-up

Floor drain recommended
