PrepUV

DST 801

Effective Sanitation of Preparation Rooms and Beyond

The PrepUV is a portable sanitizer for the removal of infectious microorganisms such as bacteria, mold and virus.

Effective

Lethal to virus, bacteria and other microorganisms.

Disinfects both air and exposed surfaces utilizing germicidal ultraviolet (UV-C) wavelength lamps in unoccupied rooms.

Portable

Compact, lightweight, stainless-steel design.

Portable unit provides disinfection wherever and whenever necessary with programmable timer and remote control for easy use.

Efficient

A 200 square foot room can be treated in an hour or less depending upon the required dosage and distance from the fixture(s).

Lamps good for 13,000 hours.
